Current status	Approved after amendments made

Ethics application

Guidance

The applicant confirms to have read and understand the the ethical principles as outlined in the Code of Ethics for researcher in the social and behavioural sciences.

The applicant confirmed adhering to the ethical guidelines of the Ethical Code of Conduct of the NIP or NVO.

The applicant confirmed that the proposed research plans do not fall within the scope of the Medical and Scientific Research on Humans Act (WMO).

Explain why your proposed research plan does not fall within the scope of the WMO.

Research is subject to the WMO if the following criteria are met: 1) It concerns medical scientific research and 2) participants are subject to procedures or are required to follow rules of behaviour. Please refer to these criteria in your answer.

Our proposed research is a study of online responsible gambling measures and their impact on gambling behaviors. While it involves human participants, it does not meet the criteria for medical scientific research as defined by the WMO. Participants are not subjected to medical procedures nor are they required to follow rules of behavior.

Prior ethical review

Has this project already been reviewed by another Ethics Review Committee?

Yes

Please provide details on the following: 1) the name of the committee and organisation it is a part of; 2) date when the application was reviewed.

Collection of the data for this study, is a part of approved "A Safe Bet" project (No. ETH2324-0128; POC stage only, Ethical approval for Alpha and Beta phases in progress). Additionally, a similar

study has been already reviewed and approved by the ERB of the Dept. of Psychology of the Erasmus University Rotterdam (No.20-066a2).

Append the letter/correspondence containing the decision of this committee.

Research project details

Project title (short)

Developing User-Centered Responsible Gambling Tools: An iterative approach via the involvement of an Experts by Experience Panel

At which location(s) will the study be performed?

The study will be conducted entirely in an online environment. Participants will engage with research material through secure and dedicated online platforms i.e. Microsoft Teams, Zoom, Google Meet and Qualtrics.

Which is/are the main question(s) of the study?

The principal inquiries guiding this study pertain to the integration of active gamblers through the formation of an Expert by Experience panel. This panel will serve as a conduit for soliciting valuable input and feedback to inform the development of Responsible Gambling (RG) tools. In different

phases of the project, three user research streams will be utilized interchangeably, depending on the specific research questions and needs at hand.

Stream 1 RQ will focus on the usability of RG tools - user goals and outcomes, functionality testing and navigation.

Stream 2 RQ will focus on content and copy of RG tools - information communication, relevance of the language and user engagement.

Stream 3 RQ will focus on UX and UI interplay - the impact of design choices, user preferences and overall experience.

Describe the method of the study

Give a detailed description of the design and variables, materials, and procedures so that it will be clear what a participant will have to do and will experience during the experiment. Name and describe (briefly) all independent variables, tasks, procedures, machinery, etc. and time investment for participants.

Design and variables (dependent and independent)

Depending on the streams of user research, the session will adopt qualitative research designs incorporating various research methods. These may include but are not limited to surveys, structured or semi-structured individual interviews, and focus groups.

Dependent Variable: The dependent variable is the application/implementation of the online RG measures. This will be assessed by feedback on usability, clarity of the content and copy and UX and UI experience.

Independent Variables: The independent variables are the aspects of the RG measures that are modified based on feedback from the participants. These include the content and copy of the RG measures, the design elements (UX/UI), operational features, and the overall user experience. These variables are manipulated through iterative cycles of feedback, refinement, and retesting, with the goal of optimising the RG measures.

NB: The risk levels (low, medium, high), along with various demographic characteristics, will be stratified in sessions 2 and 3. This approach ensures we attain a balanced representation across risk categories, representing a naturalistic sample from the broad spectrum of gamblers.

Materials, Stimuli, and/or Apparatus

Stream 1: In this user research, we will use mock-ups, prototypes, and images.

Stream 2: In this user research, we will employ survey, wireframes, and images.

Session 3: In this user research, we will utilize mock-ups, prototypes, wireframes, and images.

Procedure

Please find the research plan, detailed recruitment plan & procedure in the attachment below.

Stream 1

For usability user research, a sample size of 10-15 participants will be randomly selected from 'Experts by Experience' (EbE) each time, irrespective of their risk level. The session will be one-on-one and take approximately 20 minutes.

The following methods can be implemented during this stream of user research:

- Usability testing - Participants are asked to complete a task or a series of tasks in the prototype. When they get stuck or lost, the design is revised.
- Think-aloud method - Participants are asked to complete tasks or a series of tasks in the prototype while they narrate their thoughts. This method is used to uncover participants' perceptions.
- Semi-structured interview questions - to discuss their individual experiences, thoughts and reactions toward the presented material.

Within these study methods, participants can expect to discuss:

- Ease of use. For example, "How easy did you find using responsible gambling tools?"
- Actual system usage. For example, "I noticed you would not open responsible gambling tool explanations before acting, can you tell me why?"
- Subjective experience. For example, "Tell me about your experience using responsible gambling tools and information provided about them?"

Stream 2

For exploring the content and copy of the Responsible Gambling (RG) tools, we plan to form 6 focus groups, each comprising of 8 participants categorized by their risk levels (low, medium, high). This approach will result in each time inviting a total of 48 participants from the EbE panel. The session will take approximately 60 minutes.

The following methods can be implemented during the session:

- Moderated mockup tours - Digital surveys displaying videos and images with follow-up questions asking for participant feedback.
- Wireframes – low-fidelity prototypes of the RG tools that are used to visually guide participants through the tool's structure and layout.
- Focus groups - Group discussion and guided conversation. Participants will discuss together their experiences, thoughts, and reactions towards the material presented.
- Tailoring studies – Prototypes of the content and design of the messages are shown to participants to assess their preferences. This is ultimately to understand how to tailor content and design in the final product.
- Surveys – used before the focus groups to capture unbiased participant feedback.

Within these study methods, participants can expect to discuss:

- Subjective experience - The experiences the participant can have while interacting with the material and the reasons behind this.
- Perceived usefulness - The degree to which a participant finds the material useful and the reasons for this.
- Emotional states. For example, "How does receiving this message or seeing this word make you feel?"
- Likeability. For example, "What do you like or dislike about this message/content?"

Stream 3

In evaluating the interplay between User Experience (UX) and User Interface (UI), the plan is to randomly select approximately 30 new participants from the EbE panel on each occasion. This will

involve organizing 30 individual sessions, with 10 participants from each risk level. The session will take approximately 30 minutes.

The following methods can be implemented during this stream of user research:

- Usability testing - Participants are asked to complete a task or a series of tasks in the prototype. When they get stuck or lost, the design is revised.
- Think-aloud method - Participants are asked to complete tasks or a series of tasks in the prototype while they narrate their thoughts. This method is used to uncover participants' cognitive processes and perceptions.
- Individual semi-structured interviews - One-on-one sessions with participants to discuss their individual experiences, thoughts and reactions toward the presented material.
- Wireframes – low and high-fidelity prototypes of the RG tools that are used to visually guide participants through the tool's structure and layout.
- Tailoring studies – Prototypes of the content and design of the messages are shown to participants to assess their preferences. This is ultimately to understand how to tailor content and design in the final product.

Within these study methods, participants can expect to discuss:

- Subjective experience - The experiences the participant can have while interacting with the material and the reasons behind this.
- Perceived usefulness. For example: "What tools or features related to responsible gambling do you believe are crucial for positive user experience?"
- Feedback on design choices. For example: "Are there specific design elements that encourage or discourage your engagement with responsible gambling features?"

If applicable, upload materials to illustrate the method of the study.

Start date of the project

01 Apr 2024

Are you asking for ethical approval regarding a collaborative project?

No

Please upload any relevant project details, particularly full documentation for collaborative projects, including ethical approval for the full project if available.

Type of research

Will you obtain primary data directly from individuals?

Yes

Please specify the method(s) you will be using.

online interviews, online focus groups, surveys.

Will you obtain publicly available data?

No

Will you obtain existing datasets?

No

Does your research involve existing data or secondary data collected and/or owned by someone else?

Which categories of personal data will you be collecting?

Gender

Private contact information (e.g., E-mail address, telephone number)

Date of birth or age

Data management

Describe where, how, and for how long the data will be stored. If applicable, describe separately for personal data, sensitive data, and anonymous data.

All research data will be stored securely by the EUR. This includes consent forms, video or audio recordings, transcripts and data reports. Additionally, a participant database is stored in our Qualtrics account, which participants can opt out of every time they receive an email. Video and audio recordings will be destroyed once their information has been fully transcribed and used for reporting and research. The rest of the participant data will be kept for at least 10 years as per GDPR regulations.

Who will be able to look into the collected data?

Access to the data will be granted to the primary responsible researchers (H. Galvin, M. Boffo) and to those carrying out the research (E. Sabaliauskaitė, M. Matsinger, N. Grigoliūtė)

Will participants be able to look into their own and/or anonymized group data?

No

Please explain why not.

After the interviews, all data will be anonymized, transcribed, and thematically evaluated. This rigorous process ensures that the data cannot be traced back to the individual or group, preserving confidentiality and privacy.

Do you share your dataset with someone else within the same institute or from a different institute during your research?

No

Recruitment and characteristics of participants

What is the intended number of participants?

600

How will participants be recruited?

A detailed recruitment plan can be found in the attachment regarding research project details.

Describe the participant population. If applicable, describe inclusion and exclusion criteria.

The participant population for this study includes active online gamblers who are registered with the collaborating gambling operators (namely Holland Casino (NL) and VF2011 Limited, U.K., a subsidiary of Playtech Plc, including Sun Bingo, Sun Vegas, Fabulous Bingo, Fabulous Vegas platforms).

The inclusion criteria are as follows:

1. Active account holders of collaborating online gambling platforms,
2. Aged 18 or older, to comply with the legal age for gambling.
3. Able to provide informed consent.
4. Willingness to participate in individual sessions and/or focus groups, as well as to complete surveys.
5. Ability to communicate effectively in English or Dutch, depending on the individual session or focus group they are participating in.
6. Demonstrated history of active online gambling behavior.

Will there be any kind of compensation for participating in this study?

Yes

Please describe the nature of the compensation and when it will be allocated.

Participants will be remunerated through monetary compensation in the form of vouchers, specifically from Bol or Amazon. Irrespective of the stream of user research in which they participate, each successful participant will receive a compensation minimum of 10 euros, acknowledging and appreciating their valuable contributions to the study.

Informing your participants

Do you seek active, voluntary and informed consent from all participants (and/or their legal guardians) before they start the study?

Yes

Will participants participate in the study after they (and/or parents/caretakers) are made aware of their right to withdraw at any time during or after the experiment (even when they receive compensation) and to have their data destroyed?

Yes

Is it possible that your study will have incidental findings?

No

Will any information be withheld from the participants before they start the study?

No

Will participants be fully debriefed after their participation has ended?

Yes

Risks or negative consequences

Could participants experience any negative consequences from participating in the study?

No

Could participating researcher(s) experience any negative consequences from the study?

No

Are participants in a relation of dependency or subordination to the researcher(s)?

No

Are there any ethical concerns related to the power relationship or conflicts of interest between the researchers and related others?

No

Does your research involve any of the following activities?

Not applicable

Closing details

Are there any other ethical issues relevant to the study that you are concerned of and that have not been discussed?

No

Uploads

Have you consulted a data steward about this project?

Yes

Do you have a Data Management Plan for this project?

Yes

If you have a Data Management Plan, please upload it here.

Please upload the following documents when applicable

Information letter(s)

Informed consent form(s)

Debriefing information

Topic lists, survey questionnaires etc.

1/1

Dear Harriet Galvin,

Department

Department of Psychology, Education and
Child Studies

On the 15th of September 2023 the DPECS Research Ethics Review Committee received your request for approval of your research project A Safe Bet: design and pilot evaluation of a player-tailored online responsible gambling promotion framework. . This application concerns an amendment to the project with reference nr. ETH2122-0810. Thank you for submitting your research proposal.

Visiting address

Erasmus School of Social and Behavioural
Sciences
Burgemeester Oudlaan 50
Mandeville Building

Hereby, I am pleased to inform you that the Committee has decided to advise positively on your application. Based on the information you have provided, we conclude that your research proposal sufficiently respects the safety and rights of participants and recognises the responsibilities of the researcher(s) involved and of their host and sponsoring organisations. The approval decision is valid for three years.

Postal address

PO Box 1738
3000 DR Rotterdam
The Netherlands

Once you start your research, please be aware that you are responsible for adhering to the Netherlands Code of Conduct for Research Integrity whether working individually or in a team. Please note that you are required to submit an amendment in case any significant changes occur.

E ec-dpecs@essb.eur.nl
W www.eur.nl/essb/English

Yours sincerely,

On behalf of the DPECS Research Ethics Review Committee

Dr. Jacqueline Schenk

Chair Research Ethics Review Committee Department of Psychology, Education and
Child Studies (DPECS)

You can object to this decision with the Dean of the Erasmus School of Social and Behavioural Sciences. The term for submitting a notice of objection is six weeks. The period shall begin on the day following the date of this letter. Information on how to file an objection is [here](#) available.

Camila Villegas

Concerns: Ethics review application 20-066 “Formative evaluation of the design of a mobile application for student well-being and academic performance”, submitted on 23 October 2020

Rotterdam, 13 November 2020

Dear Camila,

Your research project “Formative evaluation of the design of a mobile application for student well-being and academic performance” has been approved by the Ethics review Committee DPECS. This approval is limited to the activities described in the above mentioned application.

With kind regards,

Ethics review Committee DPECS (EC-DPECS)

Jacqueline Schenk (chair)
Diane Pecher
Freddy van der Veen
Peter Verkoeijen
Femke Truijens
Rianne Kok

Research plan, detailed recruitment plan & procedure

As outlined earlier, the study will centre on the ongoing evaluation of participants' engagement, perception, and interaction with the responsible gambling tools. This assessment will occur at multiple stages and at various time points and the materials and procedures will depend on the chosen user research stream. The preliminary user research plan for different project phases is depicted visually in Figure 1.

	Proof of Concept (POC)	Alpha	Beta
Stream 1 “Usability”	✓		✓
Stream 2 “Content & Copy”		✓	✓
Stream 3 “UX & UI interplay”		✓	✓

Figure 1. Visual representation of user research plan for different project phases. This plan is subject to modification based on the project’s evolving needs.

Panel Set up

For the initial recruitment of the 'Experts by Experience' (EbE) panel, invitations will be sent to a total of 600 active gamblers according to their risk level at the time (200 low, 200 medium, 200 high) through collaborating gambling operators in both United Kingdom and the Netherlands. Risk levels will be assessed by operators, who will evaluate the frequency of daily risk scores assigned to a player over a 90-day calendar period and identify the dominant risk level. The emphasis in these invitations will be on the unique opportunity for individuals to contribute to the development of Responsible Gambling tools. Participants will be assured that joining the panel is entirely voluntary and will not impact their account status with gambling operators. Confidentiality will be a key point of emphasis, with participants being informed that their input will be used solely for the development of RG tools. Interested individuals will be required to provide their consent through a Qualtrics form, ensuring an independent and voluntary recruitment process. Subsequent panel recruitment and further communication will be directly managed by the EUR.

Stream 1

For usability user research, a sample size of 10-15 participants will be randomly selected from ‘Experts by Experience’ (Ebe) each time, irrespective of their risk level. The recruitment process will entail sending email invitations in batches of 10 until a sufficient number of participants sign up for the session. The session is expected to last around 20 minutes.

Procedure:

- A participant receives an email invitation with a link to register for a 1-on-1 session.
- At the start of the session, participants will be introduced to the research and asked to sign informed consent via Qualtrics.

- After successfully completing the session, participants will receive further information on receiving compensation for participation.

Stream 2

To assess the content and copy of the Responsible Gambling (RG) tools, our strategy involves creating 6 focus groups, each comprising of 8 participants categorized by their risk levels (low, medium, high). This approach will result in inviting a total of 48 participants. In this specific stream of user research, we plan to reinvoke participants from the usability research. To recruit new additional participants, invitation emails (minding the risk level) will be sent to EbE panel members. Invitations will be sent in batches of 10 until a sufficient number of participants sign up for each risk level. The session is expected to last around 60 minutes. A senior team member or psychologist will always be present during high-risk focus groups to provide additional support as needed.

Procedure:

- A participant receives an email invitation with a link to register for a focus group.
- At the start of the session, the researcher will introduce participants to the session aims and each will be asked to sign an informed consent and complete 5-minute survey seeking their unbiased opinions on the content and language employed in relation to responsible gambling.
- After successfully completing the session, participants will receive further information on receiving compensation for participation.

Stream 3

In evaluating the interplay between User Experience (UX) and User Interface (UI), the plan is to randomly select approximately 30 new participants from the EbE panel on each occasion. This will involve organizing 30 individual sessions, with 10 participants from each risk level. To recruit participants, invitation emails (minding the risk level) will be sent to EbE panel members. Invitations will be sent in batches of 15 until a sufficient number of participants sign up for each risk level. Out of the 30 sessions planned, 15 will be conducted in Dutch, and the remaining 15 will be held in English. Sessions will last approximately 30 minutes. A senior team member or psychologist will always be present during high-risk sessions to provide additional support as needed.

Procedure:

- A participant receives an email invitation with a link to register for a 1-on-1 session.
- At the start of the session, participants will be introduced to the research and asked to sign informed consent via Qualtrics.
- After successfully completing the session, participants will receive further information on receiving compensation for participation.

Plan Overview

A Data Management Plan created using DMPonline

Title: Developing User-Centered Responsible Gambling Tools: An iterative approach via the involvement of an Experts by Experience Panel

Creator: Harriet Galvin

Affiliation: Erasmus University Rotterdam

Template: Data Management Plan v4.5

Project abstract:

This project is centered on the gradual enhancement of online Responsible Gambling (RG) tools utilized within the “A Safe Bet” RG framework. We intend to engage individuals with diverse firsthand gambling experiences to participate in our study, forming an Experts by Experience panel (EBE). Depending on the specific needs of the project, panel members will be invited to participate in semi-structured online interviews or online focus groups. Through these interactions, we aim to gather valuable insights and feedback on various aspects of the developed RG tools, including usability, content & language, as well as user experience (UX) and user interface (UI). This collaborative approach will ensure that the RG tools are effectively tailored to meet the needs and preferences of our target audience.

Last modified: 19-03-2024

Developing User-Centered Responsible Gambling Tools: An iterative approach via the involvement of an Experts by Experience Panel

General

Please tick the following boxes if you agree to act according to the following terms:

- I will answer all questions truthfully and to the best of my knowledge
- I will discuss the data management plan with my research team
- I will check and, if necessary, update my data management plan a minimum of once a year

Support in writing a data management plan is available through the [faculty Data Stewards](#). Which research support professional is available for you?

- Data Steward of my own faculty - ESSB

Scientific research must be conducted in line with existing guidelines on good research practices and integrity. Please tick the boxes if you have read and understand these guidelines and will act accordingly.

- The European Code of Conduct for Research Integrity (ALLEA, 2017)
- The Netherlands Code of Conduct for Research Integrity (VSNU, 2018)

Briefly summarize the project background and research question(s) to help others understand the purpose for which the data are being collected or created

The principal inquiries guiding this study pertain to the integration of active gamblers through the formation of an Expert by Experience panel. This panel will serve as a conduit for soliciting valuable input and feedback to inform the development of Responsible Gambling tools. The research will employ an iterative design evaluation process, transitioning from established RG tools to newly introduced measures designed to be both appealing and utilitarian for the targeted users, i.e., gamblers. In different phases of the project, three user research streams will be utilized interchangeably, depending on the specific research questions and needs at hand.

Stream 1: “Evaluating Usability with Prototype Walkthrough”

The goal of this user research stream is to gain insights into the user-friendliness and effectiveness of the tools, informing any necessary adjustments or improvements to enhance the overall usability and user experience. Additionally, we aim to understand how individuals want to use these tools and the specific outcomes they seek, further contributing to a comprehensive understanding of user preferences and needs.

Stream 2: “Testing Content and Copy with Wireframes”

The goal of this user research stream is to understand user perception and engagement of the written content. It includes examining how well the language, instructions, and informational content resonate with users to fulfill the intended purpose.

Stream 3: “Evaluating User Experience (UX) and User Interface (UI) Interplay”

The goal of this user research stream is to investigate the overall user experience and user interface when interacting with responsible gambling tools, with an additional focus on understanding user preferences and areas for potential improvement in the future. It will encompass various aspects of UX such as usability, accessibility, information architecture, and emotional response of users, and UI such as layout, colors, buttons, and other visual elements that users interact with.

Specify the research type and briefly describe the methodology, the types of data to be generated and/or collected, and the tools used for data collection

The research methodology is qualitative research. Depending on the project needs participants will be invited for semi-structured interviews or focus groups that will be video/audio recorded via online platforms (Microsoft Teams, Zoom etc.) Prior to their

participation, participants will also be asked to complete demographic questions (limited to age and gender) and, if applicable, a brief survey using the Qualtrics platform.

Specify the (financial and time) resources needed for data management in this project

Data management costs are covered internally by collaborating gambling operators (ie, in-kind contribution) to manage the participant's initial risk level segmentation for the EbE recruitment batch email procedure. All other data processing and management activities are covered by PhD contract and EUR facilities.

Preparation: Legal Arrangements and Policy

1. With whom will you need to make legal arrangements?

- With research participants
- With third parties
- For working with multiple research partners

2. List the agreements that you will initiate and with whom will you make them.

Who	Type of agreement
Third-party	• Collaboration agreement (& sponsors): gambling operators (Holland Casino, PlayTech)
Multiple research partners	• Collaboration agreement: UvA • Non-disclosure agreement: UvA
Research participants	• Information brochure & informed consent (all streams)
Third-party	• Funder ICRG

3. List the agreements or other data management policies that you need to uphold but did not initiate. If you are reusing existing data, list the terms of use under which you may re-use them.

Who	Type	Version and Date
Zoom	Terms of Service	
MS Teams	Terms of Service	
Holland Casino	Terms of Service	
PlayTech (VF2011 Limited; U.K., subsidiary of PlayTech Plc including Sun Bingo, Sun Vegas, Fabulous Bingo and Fabulous Vegas platforms)	Terms of Service	
EUR	RDM policy of Erasmus University Rotterdam (EUR)	
EUR	Internet and ICT facilities policy	
Atlas.ti	Terms of Service	
Qualtrics	Terms of Service	
Amberscript	Terms of Service	

4. Do you need to obtain ethical approval for your research project?

- Yes, I am preparing to submit my application

5. If you have obtained ethical approval, list the reference number

Question not answered.

During research: Collecting and analyzing

6. Specify what data you will be collecting and indicate format, estimated size, and whether this is data that you will be generating or existing data that you will be re-using.

Type	Format	Estimated size	Generate	Re-use	Data Classification (optional)
Digital survey data	.csv	1-5 GB	Yes	No	Internal
Interview transcripts	.docx/.odt	<1 GB	Yes	No	Confidential
Audio-recorded qualitative feedback sessions	.mp4	5-10GB	Yes	No	Confidential
Transcripts from qualitative feedback sessions	.docx/.odt	<1 GB	Yes	No	Confidential
Feedback and suggestion data	.csv	1-5 GB	Yes	No	Internal

7. Will you be collecting or re-using (sensitive) personal data?

- Yes - Personal data that is sensitive --> Consult your faculty's Privacy Officer

8. If you collect or re-use (sensitive) personal data, how will you protect the privacy of participants when sharing your data?

- I will pseudonymize the data

9. Will you be collecting or re-using non-personal sensitive data?

- No

10. Where will you store your data during the project? You can select multiple options.

- EUR Teams/Sharepoint
- EUR OneDrive
- Other (please specify where the data will be stored in additional information box)

During the project, quantitative data from the brief surveys and online forms in Streams 1, 2, and 3 will be collected and stored directly within the secure database of Qualtrics - EUR.

Qualitative data from interviews and focus groups will be collected using secure video conferencing platforms like Zoom or MS Teams, and stored directly within the EUR repositories.

11. Is this other tool / are these other tools supported by the EUR or is it private?

- EUR supported

See previous question.

12. What hardware and software do you use? Select all applicable options.

- EUR supported hardware [e.g. @wEURk laptop, @wEURk workstation]
- Private hardware [e.g. personal laptop, private external hard-drive]

13. If you use private hardware, software, or freeware, please specify what and for what reason:

Research assistant and Master students do not have EUR-issued devices (i.e., laptop), so will be using their own devices for conducting interviews and transcribing data.

14. Are regular backups made of your data?

- Yes, I use only EUR supported tools (as listed in Q12), thus to a limited extent backups are made automatically

15. Who manages access to the data?

- Researcher responsible for research data management

16. Who will have access to the data (during the project)?

- Other (please specify in the additional information box).
- Only researchers as indicated under 'Administration & Project description'

The data will also be accessible to EUR MSc students, specifically Max Matsinger and Nega Grigoliute, who are involved in this research.

17. How are you going to make sure your data will be accessible in case of staff changes, illness, etc?

- There is a clear procedure in place in my research team, department, or faculty
- Other (please specify in the additional information box).

Data access will be managed by the lead project researcher Marilisa Boffo (supervisor) and shared with the project manager Harriet Galvin and research assistant Emilija Sabaliauskaite.

18. Have you and your research team agreed on a way to name and order project folders and files?

- Yes - I am working on the documentation

19. Have you and your research team agreed on how to handle versioning of files?

- Yes - I am working on the documentation

Research Publication: Data sharing and re-use

20. What data (and code) will be shared in a research data repository?

- A selection of the data (and code)

21. Please specify why you are unable to share (all) data (and code)

Audio recordings of the interviews and transcripts of qualitative interviews will also not be shared open access to protect participants' confidentiality. Additionally, at the end of the project email addresses will be deleted.

22. List the data (and code) that you plan to share in a research data repository. Also list the information / documentation / metadata that you will include to make the data package self-explanatory and re-usable in the future (for other researchers and yourself)

Data	Format	Size
Anonymized survey data	.csv	<1GB
Anonymised transcripts of qualitative interviews from Stream 1, 2 and 3.	.docx/.odt	<1GB
Study protocol for each stream	.pdf	<1GB
Wireframes and screenshots of the RG tools	.png/.jpg	<1GB
Codebook for survey and system log data	.pdf	<1GB
Data processing and statistical analysis scripts	.r/.py	<1GB
Readme text file (general description of the data, including date of collection, selection procedure of participants, tools used to collect the data, etc.)	.txt	<1GB

23. In which repository will you place the metadata, data, and/or code that are associated with your paper?

- Other (please specify in the additional information box).
- EUR Data Repository (EDR)

Open Science Framework (OSF).

24. What metadata standard will you use to document your research?

- None
- DCMI [Dublin Core Metadata Initiative] (Note: Default within the EUR Data Repository)

25. Will you place any restrictions on re-using of data?

- No

28. Under what license will you make your data available for re-use?

- Other (please specify in Q.29)

29. Please specify which license

CC BY-NC-SA 4.0

After research: Archiving

30. You may be obliged to destroy some data before archiving. Do any of such obligations apply to you?

- Yes - Privacy law [e.g. personal data of participants]

31. List the data and all documentation you will be archiving. These data constitute your archival package.

Data	Format	Size
Informed consent forms (signed)	.pdf	<1 GB
Raw data	mp4	5-10 GB
Processed data	.pdf	1-5 GB
Data Management Plan	.pdf	<1 GB
Ethical review application & approval document	.pdf	<1 GB

32. Where will you be archiving your data?

- Archive of EUR Library [retention period min. 10 years]

7

Invitation letter for EbE panel (sent from the operator's side)

Dear [name],

Erasmus University Rotterdam (EUR) has partnered with [operator] to explore ways to enhance responsible gambling practices. "A Safe Bet" project aims to create a safer and more responsible gaming experience for all. The EUR research team has been developing a set of new Responsible Gambling (RG) tools, building on lots of research and improvements to previous versions.

We're making changes to make online gambling safer and better for everyone. To make sure these changes are useful and beneficial, we need your help. We're putting together a group called the Experts by Experience panel. This group will have people who have different levels of experience with online gambling. Throughout the project, members of this panel will be asked to share their thoughts and feedback on different parts of responsible gambling tools. This could be about how easy they are to use, how well they are described, how they look, and how they feel to use. Depending on the project's needs, you might get invited to individual sessions or group discussions. In these sessions, we'll show you different versions of the tools and ask for your opinions. This is your chance to help make gambling safer and shape how it's done in the future.

The Experts by Experience (EbE) panel is managed separately by Erasmus University Rotterdam. Whether you decide to join or not won't affect your account status at [operator]. Joining is totally up to you, and you can quit whenever you want without needing to explain why. If you do decide to take part, we'll thank you for your time and input with Bol or Amazon vouchers.

We really appreciate your help, and your thoughts are super important to the success of this project. Thank you for thinking about joining us, and we hope you decide to come on board. Your special point of view will really make a big difference!

To register, please follow the link:

Thank you,
[.....] on behalf of the EUR research team

Invitation letter (Stream 1)

Welcome to the Erasmus University Rotterdam (EUR) "A Safe Bet" Project! We're excited to have you on board as a member of the Experts by Experience (EbE) panel. This panel is made up of people like you who have personal experience with online gambling. Your input is really important, and we're looking forward to hearing your insights to help make the gambling experience better for everyone.

The "A Safe Bet" project is all about making online gambling safer and better. We're working on creating better Responsible Gambling (RG) tools. These tools are here to gently guide people in reflecting on their online gambling practices, so they can have a more intentional and enjoyable experience.

Our team has created some new Responsible Gambling (RG) tools after lots of research and improvements. We're really excited to show them to you and would love your help in making them even better. We're especially interested in hearing what you think about how easy they are to use and how well they work. We also want to know how you'd like to use these tools and what you hope they'll help you achieve. Your thoughts are super important for making these tools the best they can be and giving you a great experience using them.

Research details:

- Purpose: To understand how easy it is to use Responsible Gambling (RG) tools.
- Format: 1-on-1 online interview. During the session, a researcher will walk you through a prototype and ask open-ended questions.
- Language: Dutch or English.
- Duration: Approximately 20 minutes.

Why participate?

- Contribute to the improvement of Responsible Gambling tools.
- Shape the future of responsible online gambling.
- Receive compensation for your time and effort (10€ Bol or Amazon voucher).

How to participate:

To participate, simply book a date and time that suits you through this link: [link]

Once you've chosen a time, you'll receive an automatic message containing the Zoom meeting link. If you're unable to attend, please cancel the scheduled interview at least 24 hours in advance.

Important information:

The decision to join this project is completely up to you! If you choose to join, you can stop being part of it whenever you want, and you don't have to give a reason why. We don't expect there to be any problems or discomfort while you're taking part in this research.

If you have any questions regarding this project, please contact: gamblingresearch@essb.eur.nl

We really appreciate your contribution, and your insights are incredibly important for our project to succeed. Thank you for thinking about being a part of this important initiative; your unique perspective will really make a big difference!

Invitation letter (Stream 2)

Welcome to the Erasmus University Rotterdam (EUR) "A Safe Bet" Project! We're excited to have you on board as a member of the Experts by Experience (EbE) panel. This panel is made up of people like you who have personal experience with online gambling. Your input is really important, and we're looking forward to hearing your insights to help make the gambling experience better for everyone.

The "A Safe Bet" project is all about making online gambling safer and better. We're working on creating better Responsible Gambling (RG) tools. These tools are here to gently guide people in reflecting on their online gambling practices, so they can have a more intentional and enjoyable experience.

Our team has developed a set of new Responsible Gambling (RG) tools, drawing on extensive research and improvements to previous versions. We are enthusiastic about sharing these tools with you and invite your collaboration in fine-tuning them. We are particularly interested in understanding how well the language, instructions, and information provided on online responsible gambling sites and tools connect with users. Your feedback will be super important in making sure these tools connect well with users like yourself.

Research details:

- Purpose: To gain insight into the language and information of Responsible Gambling (RG) tools.
- Format: Online focus group with a maximum of 8 participants. In this session, a researcher will present various outlines and prompt open-ended questions for discussion. You'll have the opportunity to share your thoughts and engage in discussions with fellow participants. The researcher will guide and lead the discussion.
- Language: Dutch or English.
- Duration: Approximately 60 minutes.

Why participate?

- Contribute to the improvement of Responsible Gambling tools.
- Shape the future of responsible online gambling.
- Receive compensation for your time and effort (10€ Bol or Amazon voucher)

How to participate:

To participate, simply book a date and time that suits you through this link: [link]

Once you've chosen a time, you'll receive an automatic message containing the Zoom meeting link. If you're unable to attend, please cancel the scheduled interview at least 24 hours in advance.

Important information:

The decision to join this project is completely up to you! If choose to join, you can stop being part of it whenever you want, and you don't have to give a reason why. We don't expect there to be any problems or discomfort while you're taking part in this research. Because you would be participating in a group discussion, you should realize that the other participants will also hear your opinion about responsible gambling tools. We will ask all participants not to talk to people outside the group about what was said in the group.

If you have any questions regarding this project, please contact: gamblingresearch@essb.eur.nl

We really appreciate your contribution, and your insights are incredibly important for our project to succeed. Thank you for thinking about being a part of this important initiative; your unique perspective will really make a big difference!

Informed Consent for Joining Experts by Experience Panel

Welcome to the Erasmus University Rotterdam (EUR) “A Safe Bet” project. The EUR has teamed up with [operator] to help evaluate how we can better support your responsible gambling practices.

What is the research about?

“A Safe Bet” project aims to assess and enhance the quality and safety of online gambling environments, by evaluating Responsible Gambling (RG) tools.

Why are we asking you to participate?

We invite you to participate as every customer's experience gambling online at [operator] is unique. By participating, you're helping us make your online gambling experience safer. Plus, you're also contributing to making online gambling safer for everyone by helping us develop better practices.

What can you expect?

If you join this project, you'll become a part of our Expert-by-Experience panel. This panel includes people who have online gambling experience. During the project, you will have a chance to share your thoughts and feedback about Responsible Gambling tools. We'll talk about how easy the tools are to use, the language they use, how they feel to use, and how they look. Depending on the project's needs, we might ask you to fill out surveys, chat with us one-on-one, or join group discussions. And after each time you give us feedback, we'll thank you with compensation for your help.

You decide whether to participate...

Taking part in this project is completely up to you. It won't affect your account status at Holland Casino Online or Sun/Vegas Brands in any way. If you decide to join, you can change your mind anytime without having to give a reason.

What are the potential risks and discomforts?

We do not expect any risks or discomforts while participating in this project.

What data will we ask you to provide?

In addition to the questionnaire data, we will ask you to provide general demographic information, including gender and age. We'll ask for your email address only to identify you as a participant in our research project and to invite you to future feedback sessions. Your email won't be shared or used for anything else, and we'll delete it from our records once we've finished collecting data.

Who can see your data, and how long will it be stored?

All the research data will be kept safe and secure by the EUR. Only the people involved in the project will be able to see the raw data (I.e. questionnaire responses, videos, audio recordings). If any research findings are published in academic journals or books, your identity will be fully protected - nothing that could identify you will be revealed. The data we collect might be really useful for education and future research. We'll make sure to remove any personal information before sharing the data publicly. Your data will be kept for at least 10 years. This way, other researchers can check that the research was done properly.

What happens with the results of the project?

We'll carefully study the project's results to make online gambling better, especially by improving Responsible Gambling tools. Additionally, findings may be shared with other individuals involved in the research. If you'd like to get a brief overview of the general findings, please indicate your preference, and we'll send them to you by email once the project is finished.

Do you have questions about the project?

If you have any questions about the project or your privacy rights, such as accessing, changing, deleting, or updating your data, please contact the research team using the information provided

below.

Email: gamblingresearch@essb.eur.nl

Do you have a complaint or concerns about your privacy? Please email the Data Protection Officer (fg@eur.nl) or visit www.autoriteitpersoonsgegevens.nl. (T: 088 - 1805250)

Declaration of Consent

Having carefully reviewed the information, I fully understand the objectives of the study and the specific data that will be gathered from me. I took the opportunity to ask questions, and I'm satisfied with the explanations provided. Importantly, I acknowledge that I have the right to cease my participation at any time, and this decision will have no consequences.

By signing this form,

1. consent to participate in this research.
2. consent to the researcher's collection, use, and retention of the following data: video, audio recordings of my feedback and personal data pertaining to my age and gender.
3. consent to my data being stored and used for future research and educational purposes.
4. confirm that I am at least 18 years old¹.
5. confirm to be an active account holder of [operator] online gambling platform.

"Experts by Experience of the Responsible Gambling Tools: Evaluating Usability with Prototype Walkthrough"

Introduction

Welcome to the Erasmus University Rotterdam (EUR) "A Safe Bet" Project. We're excited to share that we're teaming up with [operator]. Our goal is to improve how we understand and promote responsible gambling.

We invite you to join a project led by Erasmus University aimed at making online gambling safer and better. This project focuses on creating Responsible Gambling (RG) tools. These tools are meant to help people think about their online gambling habits, so they can have a safer and more enjoyable time. Your input is really important for shaping these tools and making online gambling a safer place for everyone.

Research Focus

Responsible Gambling (RG) tools are like safety nets to help prevent the negative impacts of gambling. These effects could be spending too much time or money on gambling sites, which can hurt your personal and financial health. RG tools come in different forms, like limits on how much you can deposit or how long you can play. They might also include messages that pop up after you've played for a certain amount of time or made a certain number of bets. The main goal of RG tools is to gently guide you towards recognizing any changes in your gambling habits, offering you the opportunity to make adjustments and cultivate healthier habits over time.

We've improved and created some new Responsible Gambling (RG) tools after lots of research. We're really excited to show them to you and would love your help in making them even better. We're especially interested in hearing what you think about how easy they are to use and how well they work. We also want to know how you'd like to use these tools and what you hope they'll help you achieve. Your thoughts are super important for making these tools the best they can be and giving you a great experience using them.

Participation

We'd love for you to join us because we know that everyone's experience with online gambling at [operator] is different. By taking part, you're helping us make your gambling experience safer, and you're also helping us make online gambling safer for everyone. Your thoughts are really important, and we're grateful for your help in creating a secure and fun environment for online gambling enthusiasts.

What can you expect?

If you decide to take part in this study, you'll be invited to a semi-structured one-on-one online interview. In this interview, a researcher will show you a prototype of some responsible gambling tools, both current and improved versions. They'll ask for your thoughts on how easy the tools are to use. Your feedback will be really helpful for the study. The interview will be recorded, and it should take about 20 minutes.

We expect the session to follow this general agenda:

- We'll start with an introduction and a brief reminder of the discussion's purpose.
- You'll be led through a prototype showcasing examples of current and improved Responsible Gambling tools.

- During this session, we'll ask for your thoughts on how easy the tools are to understand and use. We want to know if they work well and if you face any problems using them. You will also be invited to share any other experiences you've had.
- The session will conclude with a summary of the discussed information and additional details on the process for receiving compensation.

Decision to participate

The decision to join this project is completely up to you. Your decision will to participate or not, won't change anything about your account at [operator]. If choose to join, you can stop being part of it whenever you want, and you don't have to give a reason why.

Potential Risk

Taking part in this project shouldn't cause you any problems or make you uncomfortable. It's meant to be a positive experience for everyone involved.

Compensation

Once you finish the interview, you'll get a 10-euro voucher that you can use at [Bol / Amazon]. It's a thank-you for your time and help.

Personal Data

In the course of the session, we will collect the following personal data from you: age and gender. We'll make sure to keep all the information we collect completely private and confidential, so your identity stays protected.

Data Security and Confidentiality

Any data we collect will be kept safe according to EUR's policy. Even though it's anonymous, only the core research team will be able to access it to make sure it stays confidential. If we publish our findings, we'll make sure the data can't be linked back to you. Your privacy is really important to us.

When we transcribe the recorded sessions, we'll give you a random ID instead of using your name. We'll also keep your age, gender, and recordings separate from the transcriptions to protect your privacy even more. Additionally, we'll take out any personal info from the transcriptions to make sure you stay anonymous.

Data Storage

The EUR will keep all research data safe and secure. Once we've transcribed the recorded sessions, we'll delete them. The transcription will be retained for a minimum of 10 years, in accordance with the regulations set forth by the General Data Protection Regulation (GDPR).

Data Usage

Some of the data we collect, after making sure it can't be linked back to you, might be really useful for educational purposes or future research. If we decide to share this data publicly, we'll ensure that none of your personal information, which could identify you, is included. Your privacy is a top priority for us, and we'll take all necessary measures to safeguard your information.

What happens with the results of the study?

We'll carefully study the project's results to make online gambling better, especially by improving Responsible Gambling tools. Additionally, findings may be shared with other individuals involved in the research. If you'd like to get a brief overview of the findings, please indicate your preference, and we'll send them to you by email once the project is finished.

Are there any inquiries or concerns you would like to address regarding the study?

Questions regarding the study or your privacy rights, including accessing, modifying, deleting, or updating your data should be directed to:

Email: gamblingresearch@essb.eur.nl

Do you have a complaint or concerns about your privacy?

Please email the Data Protection Officer (fg@eur.nl) or visit www.autoriteitpersoonsgegevens.nl. (T: 088 - 1805250)

Do you have any regrets about participating in the study?

If you decide to take part and later change your mind, that's okay. You can still stop at any time, even if you've already started. Just let us know, and we'll delete your data right away. However, there might be cases where we need to keep your data to make sure the study is done properly.

Ethics approval

This research has been reviewed and approved by an internal review committee of Erasmus University Rotterdam. This committee ensures that research participants are protected. If you would like to know more about this RERC/IRB, please visit: <https://www.eur.nl/en/research/research-services/research-quality-integrity/ethical-review>

Declaration of Consent

Having carefully reviewed the information, I fully understand the objectives of the study and the specific data that will be gathered from me. I took the opportunity to ask questions, and I'm satisfied with the explanations provided. Importantly, I acknowledge that I have the right to cease my participation at any time, and this decision will have no consequences.

By signing this form,

1. consent to participate in this research.
2. consent to the researcher's collection, use, and retention of the following data: video, audio recordings of my feedback and personal data pertaining to my age and gender.
3. consent to my data being stored and used for future research and educational purposes.
4. confirm that I am at least 18 years old¹.
5. confirm to be an active account holder of [operator] online gambling platform.

"Experts by Experience of the Responsible Gambling Tools: Testing Content and Copy with Wireframes"

Introduction

Welcome to the Erasmus University Rotterdam (EUR) "A Safe Bet" Project. We're excited to share that we're teaming up with [operator]. Our goal is to improve how we understand and promote responsible gambling.

We invite you to join a project led by Erasmus University aimed at making online gambling safer and better. This project focuses on creating Responsible Gambling (RG) tools. These tools are meant to help people think about their online gambling habits, so they can have a safer and more enjoyable time. Your input is really important for shaping these tools and making online gambling a safer place for everyone.

Research Focus

Responsible Gambling (RG) tools are like safety nets to help prevent the negative impacts of gambling. These effects could be spending too much time or money on gambling sites, which can hurt your personal and financial health. RG tools come in different forms, like limits on how much you can deposit or how long you can play. They might also include messages that pop up after you've played for a certain amount of time or made a certain number of bets. The main goal of RG tools is to gently guide you towards recognizing any changes in your gambling habits, offering you the opportunity to make adjustments and cultivate healthier habits over time.

We've created some new Responsible Gambling (RG) tools after lots of research and improvements. We're really excited to share these tools with you and would love your help in making them even better. We're especially interested in knowing how well the language, instructions, and information on online responsible gambling sites and tools connect with you. Your feedback will be crucial in making sure this information is clear and helpful for users like yourself.

Participation

We'd love for you to join us because we know that everyone's experience with online gambling at [operator] is different. By taking part, you're helping us make your gambling experience safer, and you're also helping us make online gambling safer for everyone. Your thoughts are really important, and we're grateful for your help in creating a secure and fun environment for online gambling enthusiasts.

What can you expect?

If you decide to join this study, you'll be invited to participate in a focus group discussion with a total of 8 participants. In this discussion, the researcher(s) will show visual presentations containing different messages, instructions, and other written elements about responsible gambling tools. We'll ask for your thoughts and feedback on the text and language used. Your input will be really valuable for the study. The discussion will be recorded, and it should take about 60 minutes.

We expect the session to follow this general agenda:

- 5 minutes before the focus group, you will be asked to sign the informed consent and complete a short survey, seeking your unbiased opinions on the content and language employed in relation to responsible gambling.

- At the beginning of the focus group, the researcher(s) will provide an introduction and outline the ground rules for the discussion.
- During the focus group session, you'll see visual outlines (wireframes) that show the information in responsible gambling tools. We'll lead a lively discussion and ask for your thoughts on things like how clear the information is, if it's helpful, if the language makes sense, and if the tools keep your attention when it comes to responsible gambling.
- The session will conclude with a summary of the discussed information and additional details on the process for receiving compensation.

Decision to participate

The decision to join this project is completely up to you. Your decision will to participate or not, won't change anything about your account at [operator]. If choose to join, you can stop being part of it whenever you want, and you don't have to give a reason why.

Potential Risk

Taking part in this project shouldn't cause you any problems or make you uncomfortable. It's meant to be a positive experience for everyone involved.

Compensation

Once you finish the interview, you'll get a 10-euro voucher that you can use at [Bol / Amazon]. It's a thank-you for your time and help.

Personal Data

In the course of the session, we will collect the following personal data from you: age and gender. We'll make sure to keep all the information we collect completely private and confidential, so your identity stays protected.

Data Security and Confidentiality

Any data we collect will be kept safe according to EUR's policy. Even though it's anonymous, only the core research team will be able to access it to make sure it stays confidential. If we publish our findings, we'll make sure the data can't be linked back to you. Your privacy is really important to us.

When we transcribe the recorded sessions, we'll give you a random ID instead of using your name. "Experts by Experience of the Responsible Gambling Tools: Evaluating User Experience (UX) and User Interface (UI) Interplay"

Introduction

Welcome to the Erasmus University Rotterdam (EUR) "A Safe Bet" Project. We're excited to share that we're teaming up with [operator]. Our goal is to improve how we understand and promote responsible gambling.

We invite you to join a project led by Erasmus University aimed at making online gambling safer and better. This project focuses on creating Responsible Gambling (RG) tools. These tools are meant to help people think about their online gambling habits, so they can have a safer and more enjoyable time. Your input is really important for shaping these tools and making online gambling a safer place for everyone.

Research Focus

Responsible Gambling (RG) tools are like safety nets to help prevent the negative impacts of gambling. These effects could be spending too much time or money on gambling sites, which can hurt your personal and financial health. RG tools come in different forms, like limits on how much you can deposit or how long you can play. They might also include messages that pop up after you've played for a certain amount of time or made a certain number of bets. The main goal of RG tools is to gently guide you towards recognizing any changes in your gambling habits, offering you the opportunity to make adjustments and cultivate healthier habits over time.

We've created some new Responsible Gambling (RG) tools after doing a lot of research and making improvements to older versions. We're really excited to share these tools with you and would love your help in making them even better. We're especially interested in hearing about your overall experience and how you find using the tools. We also want to know what you like and what could be better, so we can make improvements in the future. Your thoughts will be really important for making these tools the best they can be.

Participation

We'd love for you to join us because we know that everyone's experience with online gambling at [operator] is different. By taking part, you're helping us make your gambling experience safer, and you're also helping us make online gambling safer for everyone. Your thoughts are really important, and we're grateful for your help in creating a secure and fun environment for online gambling enthusiasts.

What can you expect?

If you choose to take part in this study, you'll be invited to a semi-structured one-on-one online interview. During this session, the researcher(s) will guide you through a prototype showcasing improved responsible gambling tools. We will want to know how easy and enjoyable they are to use (UX), and how they look and feel (UI). Your thoughts will help us make them even better. The interview will be recorded and take approximately 30 minutes.

We expect the session to follow this general outline:

- We'll start with an introduction and a brief reminder of the discussion's purpose.
- You'll be led through a prototype showcasing examples of Responsible Gambling tools.
- During this session, we'll seek your input on the user experience and user interface interaction, feedback on design choices, and your preferences and suggestions for RG tools.
- The session will conclude with a summary of the discussed information and additional details on the process for receiving compensation.

Decision to participate

The decision to join this project is completely up to you. Your decision will to participate or not, won't change anything about your account at [operator]. If choose to join, you can stop being part of it whenever you want, and you don't have to give a reason why.

Potential Risk

Taking part in this project shouldn't cause you any problems or make you uncomfortable. It's meant to be a positive experience for everyone involved.

Compensation

Once you finish the interview, you'll get a 10-euro voucher that you can use at [Bol / Amazon]. It's a thank-you for your time and help.

Personal Data

In the course of the session, we will collect the following personal data from you: age and gender. We'll make sure to keep all the information we collect completely private and confidential, so your identity stays protected.

Data Security and Confidentiality

Any data we collect will be kept safe according to EUR's policy. Even though it's anonymous, only the core research team will be able to access it to make sure it stays confidential. If we publish our findings, we'll make sure the data can't be linked back to you. Your privacy is really important to us.

When we transcribe the recorded sessions, we'll give you a random ID instead of using your name. We'll also keep your age, gender, and recordings separate from the transcriptions to protect your privacy even more. Additionally, we'll take out any personal info from the transcriptions to make sure you stay anonymous.

Data Storage

The EUR will keep all research data safe and secure. Once we've transcribed the recorded sessions, we'll delete them. The transcription will be retained for a minimum of 10 years, in accordance with the regulations set forth by the General Data Protection Regulation (GDPR).

Data Usage

Some of the data we collect, after making sure it can't be linked back to you, might be really useful for educational purposes or future research. If we decide to share this data publicly, we'll ensure that none of your personal information, which could identify you, is included. Your privacy is a top priority for us, and we'll take all necessary measures to safeguard your information.

What happens with the results of the study?

We'll carefully study the project's results to make online gambling better, especially by improving Responsible Gambling tools. Additionally, findings may be shared with other individuals involved in the research. If you'd like to get a brief overview of the findings, please indicate your preference, and we'll send them to you by email once the project is finished.

Are there any inquiries or concerns you would like to address regarding the study?

Questions regarding the study or your privacy rights, including accessing, modifying, deleting, or updating your data should be directed to:

Email: gamblingresearch@essb.eur.nl

Do you have a complaint or concerns about your privacy?

Please email the Data Protection Officer (fg@eur.nl) or visit www.autoriteitpersoonsgegevens.nl. (T: 088 - 1805250)

Do you have any regrets about participating in the study?

If you decide to take part and later change your mind, that's okay. You can still stop at any time, even if you've already started. Just let us know, and we'll delete your data right away. However, there might be cases where we need to keep your data to make sure the study is done properly.

Ethics approval

This research has been reviewed and approved by an internal review committee of Erasmus University Rotterdam. This committee ensures that research participants are protected. If you would like to know more about this RERC/IRB, please visit: <https://www.eur.nl/en/research/research-services/research-quality-integrity/ethical-review>

Declaration of Consent

Having carefully reviewed the information, I fully understand the objectives of the study and the specific data that will be gathered from me. I took the opportunity to ask questions, and I'm satisfied with the explanations provided. Importantly, I acknowledge that I have the right to cease my participation at any time, and this decision will have no consequences.

By signing this form,

1. consent to participate in this research.
2. consent to the researcher's collection, use, and retention of the following data: video, audio recordings of my feedback and personal data pertaining to my age and gender.
3. consent to my data being stored and used for future research and educational purposes.
4. confirm that I am at least 18 years old¹.
5. confirm to be an active account holder of [operator] online gambling platform.

Debriefing document

Dear participant,

Thank you for joining our Expert by Experience panel (EbE) to discuss responsible gambling tools. Your input has been incredibly helpful!

Purpose of the study

Our aim in convening the Expert by Experience panel was to gather different perspectives on responsible gambling tools and use this collective wisdom to improve them. Your expertise was sought because your unique ideas and knowledge are vital for ensuring the usefulness of these tools.

It is important to note that no information was withheld from you during the study. All information and relevant details for this study were disclosed at the beginning of the interview.

Confidentiality

Your privacy and confidentiality are very important to us. Anything you told us during the study, like your answers and personal details, will be anonymized and kept completely private. We'll only use your information for research and educational purposes, and we'll make sure it's stored safely according to EUR guidelines. You may decide that you do not want your data used in this research. If you would like your data removed from the study and permanently deleted please contact: gamblingresearch@essb.eur.nl

Results

Our research team will carefully analyze the feedback and insights shared during the panel discussions. As all data will be anonymized, we will identify general key themes and recommendations based on cumulative input. If you would like to receive a brief overview of our general findings when it is completed, please indicate this preference via email.

Useful Contact Information

If you have any questions or concerns regarding this study, its purpose or procedures, or if you have a research-related problem, please feel free to contact the researcher team by email: gamblingresearch@essb.eur.nl

If you have any complaints or privacy concerns, please contact the Data Protection Officer (fg@eur.nl) or visit www.autoriteitpersoonsgegevens.nl (T: 088 - 1805250).

We want to thank you once again for being part of our Expert by Experience panel study. Your thoughts and ideas have been incredibly valuable in creating better responsible gambling tools, which help make online gambling safer and more fun for everyone
